expenses and premiums, completion of
main building, maintenance of grounds,
stalls and pens. A total appropriation of
\$57,000 is asked for the coming two years.
In the year 1897 the State Historical Society of I tah was organized, having for
its general object the encouragement of
historical research and inquiry, the preservation of valuable documents, the esstallishment of a library and museum and
the dissemination of information. Later,
in the same year, it was duly incorporated and has maintained its organization
ever since. Aided by a small appropriation from the state, it secured most of
the valuable relics of the jubilee celebration of 1897, and has the nucleus of a
library, largely composed of newspapers library, largely composed of newspapers and public documents of value. For lack of proper place in which to exhibit its collection they have been stored for preservation.

> 1899 the Utah Art institute, for th advancement of the fine arts, the develpment of art education and the intro luction of art in manufacturing was in ornorated. A most valuable collection of corporated! A most valuable collection of pictures has been secured, as also of books for its library. An annual appropriation of \$1,000 has been made heretofore, the greater part of this being expended in exhibitions throughout the state of the works of art, and in giving lectures covering subjects of great interest to the entire people. As in the case of the Historical society, no proper place has been provided for the preservation of its been provided for the preservation of its

been provided for the preservation of its collections.

In 1906, the Utab Society of the Archaeological Institute of America was established as an affiliated branch of the national organization. Through the gentrous interest of private parties, explorations have been made in the San Juan region in southeastern Utah during the past two years, under the supervision of the American school and a professor of our own state university. Though limited in extent, the work has shown that Utah possesses a field of the greatest archaeological importance. The society has secured a most valuable collection of relies, and its efforts already have attracted the attention of students from all parts of the country. By reason of neglect on the part of the state, many valuable relies the country. By reason of neglect on the part of the state, many valuable relics have been secured for remote institutions, while our own have been deprived of that which they were justly entitled to retain. As in the case of the other two societies, this one is without a suitable place for the proper exhibition of its collections. In view of the importance of the work undertaken by these societies. I deem it advisable to suggest that suitable provision should be made for the continuation of the same and the accommodation tion of the same and the accommodation of their several collections—already large

and soon rapidly to increase.

The plan of "housing" them in the university of the state and under its guardlanship has strong precedent in other states, and I would recommend that in making provision for additional buildings for the university the legislature should provide for suitable rooms to be devoted to the joint and several use of these associations. By such an arrangement the speciations. By such an arrangement, the greatest usefulness of each, as well to the public as to the university, and its enlarging student body, will be greatly enhanced.

tion. It is a problem requiring much thought and attention, and care should be taken that no mistakes are made in the final disposition of the matter. A uniform system of construction with a means of raising special road funds in the various counties should be provided. What is done should be along the line of stability and thoroughness having in view and the providers. done should be along the line of stability and thoroughness, having in view a permanency which, unfortunetely, has been overlooked in many instances heretofore. Provision should be made requiring competency in those to whem the work of improvement is given. There is no occasion for me to dwell upon the advantages of such improvements to the people of the state, and I heartily recommend your prompt and most earnest consideration of this important subject.

# STATE CAPITOL.

An imperative necessity exists for the erection of a state capitol. A task of such magnitude will occupy several years' time, and the raising of funds therefor is a question of great importance. Plans for the accomplishment of this work in a satisfactory manner will be submitted.

## PUBLIC SERVICE COMMISSION

The framers of our state constitution wisely imposed upon the legislature the tuty of protecting the individual citizen from injury and oppression through com-binations of persons or associations for the purpose of controlling prices, whether the purpose of controlling prices, whether of manufacture, of commerce, or of production, or of the cost of exchange for transportation, or through extertionate rates, or discrimination in individuals on corporations who enjoy the privileges of a quasi-public character. The condition thus foreseen and provided for by the constitution makers has arisen in this state, as is now a matter of commerce broadless.

tablish just and fair dealing.
Whatever action is taken should be in the spirit of conservatism and fairness to both individuals and corporate interests such as her observations.

ests, such as has characterized the past history of the state, and which will make

generally do everything possible in the way of conserving the natural resources of the state and nation. It is not the intention to have this commission interfere with or limit the wise and proper development and application of these resources but to devise ways to use them so as to distribute the enjoyment of our natural wealth.

I therefore recommend the creation of a public services of the natural resources, to consist of three members, who shall serve without compensation.

INSURANCE

COMMISSIONER

There has been considerable discussion of the improvement of our public roads. This subject will be one of the most im-For the attainment of this end, I recinvolved. In fairness to all the people of this state, the creation of a public service commission should not be longer delayed. June 1 to Oct. 16 of the present year, the Alaskan-Tukon-Pacífic exposition. will be held at Seattle, Wash. To devise and execute plans to properly represent the state at this exposition the last leg-

has been carried on in the past, is unable to give the issurance matters that attention which their importance demands owing to the many other duties imposed upon him. In view of this fact, and in keeping with the policy of other states in this particular. I respectfully recommend, the establishment of an independent insurance department and the creation of the office of state commissioner of insurance, willes-Horn Drug Co. and other first-class drug stores have been kept busy

New Drug Maizene Creating a Big islature created a commission, composed to five governor and four members.

This commission has filed its report, in which it says: "As a matter of interstate comity, and aside from the present legislature an adapter of state commissioner of insurance, willes-Horn Drug Co. and other first-class drug stores have been kept busy
